#### **Activity 1a: Quick Audit of Current Practices**

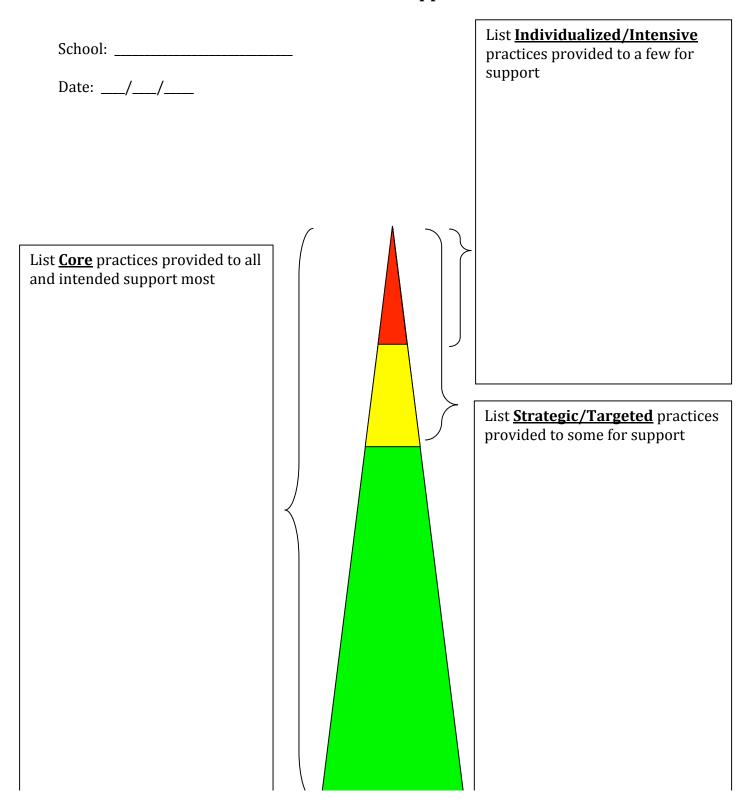

Use the blank triangle on the following page to complete Activity 1:

**Step 1**: Identify all programs/initiatives/common practices by tier
Tier I- How do you support all children? Core Curriculum- "everyone gets"
Tier II, III How do you support students who need more support? How do you build on the foundation so that all Tier II, III activities are a natural extension of core curriculum?

#### Other considerations:

Can you identify outcome for each practice? How do you measure effectiveness?(Staff performance) How do monitor progress? (student impact) How do you support teachers? (staff support)How are they linked to School Improvement? (integrated approach)

Step 1: Quick Audit of Practices within Three-Tiered Model of Support

## Activity 1b: Working Smarter

Use the Working Smarter worksheet to complete the next two steps:

Step 1: Identify Current Teams (discipline, instruction, climate, school improvement, parent support etc)

Step 2: Complete the Working Smarter document

## **Working Smarter Worksheet**

Workgroup/ Committee/ Team	Outcome/ Link to SIP	Who do we serve? (students/staff/both?)  What is the ticket in? How do folks get access to support?	Names of Staff on team	Non- Negotiable District Mandate?	How do we measure impact?	Overlap? Modify?

Step 3: Based on your results, what committees can you:

- (a) eliminate?
- (b) combine?
- (c) provide more support?(d) how can we infuse PBIS into our committees?

Determine your next step. Based on your team time discussion, list 2 action steps

#### **Defining a Coherent Office Discipline Referral Process**

Defining a coherent office discipline referral process that is compatible with SWIS<sup>TM</sup> is an access requirement and will enhance data use. Defining the process for handling problem behavior events and for documenting the information fulfills two of the ten SWIS<sup>TM</sup> requirements. Sample procedures for dealing with problem behavior events, sample definitions, and sample referral forms are available in this section and at www.swis.org.

- 1. A simple and predictable process for handling problem behavior events needs to be defined, taught, and agreed upon by all staff. Define the system and fit the problem behaviors to the system. The system should define the procedure to follow for types of problem behavior (e.g., minor/major; level 1/ level 2). We encourage schools to manage minor problem behaviors within the context in which they occur and send major problem events to the office to be handled. Many schools are defining multiple minor events as one major event. Using a flow chart format has been useful for schools. The process begins with observation of the problem behavior event and works through each component of the procedure from observation to problem solving to documentation. A generic procedure for dealing with problem behaviors, which defines a process for both minor and major problem behavior events, is offered. Schools are encouraged to create a process that is simple, efficient, predictable, and fits school resources.
- 2. Definitions for problem behaviors, locations, possible motivation, others involved, and administrative consequences need to be mutually exclusive and operationally defined. For example, SWIS<sup>TM</sup> has fields for 21 specific problem behaviors; however, each school can tailor the full list of 21 problem behaviors to fit the needs within their school. For example, if arson, bomb threats, and tobacco use are very low incidence, the school may not want to use space on the form for each of those categories. The school may opt, instead, to define those in the *other* category if they occur. The same application is true for all other categories within the SWIS<sup>TM</sup> program. The critical feature is that all staff agrees on mutually exclusive and operationally defined labels and definitions, and that the data-entry person does not have to interpret the information provided.
- 3. Referral form compatibility is another SWIS<sup>TM</sup> requirement. With efficiency and accuracy, again as a goal, the referral form must be SWIS<sup>TM</sup> compatible. Clarity on the referral form takes the guesswork out of the data entry person's job. Data will be more reliable and accurate as judgment calls are minimized. A Compatibility Checklist is an available tool for ensuring that all necessary categories are being documented on a **referral form.** We have found that schools organize the information differently, some on a half page and some on a full page. The specific grade levels represented at a school also guide the content and number of options available on an office discipline referral form. For example, middle/high schools may need to specify problem behaviors such as vandalism, alcohol use, and tobacco use, while elementary schools opt to specify those problem behaviors in the *other* category (as a result of low frequency). Three examples of referral forms are available for you to use or revise. Note the differences in size of the form, specific options available for each of the categories, and the format of the form. Example A provides all SWIS<sup>TM</sup> category options, Example B is a form used by a K-8 school and limits the problem behavior categories, but provides a communication link with staff, administration, and families. Example C is a format used by an elementary

school, limits the options, and adds a follow up agreement for students to complete after the problem event. Each of the three examples is SWIS<sup>TM</sup> compatible. Formatting the referral form for easy use while providing accurate information that is compatible with the SWIS<sup>TM</sup> referral report is critical.

Schools are encouraged to use any of this information. We encourage schools to adjust the process, definitions, and referral form to fit the culture and resources within each school.
