

Joshua Brown

I'm a staff writer at the University of Vermont covering all the natural and physical sciences, astronomy to zoology. I also work with reporters and editors from local and national media outlets to connect them with [UVM experts](#) and research news. My writing appears in [Vermont Quarterly](#), the magazine of the University of Vermont and [UVM Today](#), UVM's weekly on-line newsmagazine. By moonlight, I take on a few [freelance projects](#) for publications ranging from the *Boston Globe* to *Wild Earth*
