

ENVISION A FUTURE

where every child and youth in Vermont who requires intensive special education:

- is **welcome** in their class and community
- is taught **well**
- and has **access** to needed resources for a quality education.

Vermont I-Team

Belonging • Independence • Mastery • Generosity

WHO WE ARE

We're part of a network of professionals.

We work through a collaborative teaming model to support school teams across Vermont.

The Vermont Interdisciplinary Team is a part of the Center on Disability & Community Inclusion at the University of Vermont.

Our model

The I-Team model promotes building the capacity of the local team based on identified outcomes.

This is best accomplished by a combination of consultation, coaching, and training of the individuals who regularly interact with the student.

Ways we support teams:

- Increased membership & participation
- Universal Design for Learning
- Person-centered planning
- Curriculum-based instructional planning
- Collaborative teaming & decision-making
- Augmentative Communication
- IEP development & implementation
- Family support

OUR SERVICES

We provide technical assistance to teams supporting students with complex communication and educational profiles, ages 3-22 who:

- have an IEP
- need support to increase participation, engagement, and social connections
- need significant curriculum modifications to learn academic curriculum
- need support to participate fully in communication to the same degree as their peers

Professional Development

I-Team also provides professional development to Vermont school district personnel, family members, community providers, and general community members on a variety of topics related to the education of students with complex educational profiles.

Please note: children under the age of 3 receive support from our Early Intervention Team.
