

## Characteristics of Forage Grasses Found in the Northeast U.S.

Species	Growth Habit	Leaf Characteristics	Seedhead	Other Characteristics
<p><b>Bluegrass</b> (<i>Poa</i> spp.)  <b>Kentucky</b> – <i>P. pratensis</i>  <b>Canada</b> – <i>P. compressa</i></p> <p>A short, low growing grass; A dense, sod forming grass that spreads by short rhizomes</p>	 <p>Many short rhizomes</p>	 <p>Bluegrass</p> <p>Narrow leaves with unique boat shaped tip</p>	 <p>Panicle seedhead with very small seed</p>	 <p>Kentucky Canada</p>
<p><b>Timothy</b>  <i>Phleum pratense</i></p> <p>A tall growing bunch grass; Very winter hardy;</p>	 <p>Tall, Bunchgrass</p>	 <p>Long ligule, no auricle</p>	 <p>"spike-like" panicle seedhead</p>	 <p>Unique bulb at its roots called a "corm"</p>
<p><b>Orchardgrass</b>  <i>Dactylis glomerata</i> L.</p> <p>Tall growing bunchgrass;          Long leaves that are lighter green compared to other grasses;          Leaves are strongly folded;</p>	 <p>Prolific tillering grass</p>	 <p>Long, pointed ligule, no auricle</p>	 <p>Panicle seedhead with ball-like clumps</p>	 <p>Leaves are strongly folded</p>
<p><b>Reed canarygrass</b>  <i>Phalaris arundinacea</i> L.</p> <p>Very tall growing sod grass with extensive rhizomes; Grows best in wet soils, but tolerates well drained sites</p>	 <p>Sod forming grass</p>	 <p>long ligule with no auricle</p>	 <p>Panicle can be tight but also will open as it matures</p>	 <p>Leaves are wide but leaf blades are short relative to leaf width</p>

Species	Growth Habit	Leaf Characteristics	Seedhead	Other Characteristics
<p><b>Smooth bromegrass</b> <i>Bromus inermis</i> Leyss. Tall growing, sod forming grass; very tolerant of dry soils;</p>	 <p>Extensive rhizomes</p>	 <p>Short truncate ligule with no auricles; split sheath</p>	 <p>Panicle seedhead with large fluffy seed</p>	 <p>Wide leaf with distinct crimp ("M" marking found on most leaves)</p>
<p><b>Perennial ryegrass</b> <i>Lolium perenne</i>. A low growing bunchgrass Narrow leaves, shiny on the bottom side</p>		 <p>Leaf collar; ligules are short; claw-like auricles</p>	 <p>Perennial Annual Spike seedhead</p>	 <p>Very shiny bottom side of leaf; also a very pronounced keel</p>
<p><b>Tall fescue</b> <i>Festuca arundinacea</i> A tall growing bunchgrass; Leaves are coarse and medium-to-wide;</p>		 <p>Short, truncate ligule; Short auricle sometimes with few hairs</p>	 <p>Panicle seedhead</p>	
<p><b>Quackgrass</b> <i>Agropyron repens</i> (L.) Beauv. A tall growing creeping grass with extensive rhizomes; Leaves are medium-to-wide; Typically considered a weed;</p>		 <p>Long clasping auricles; sheaths are often but not always hairy</p>	 <p>Spike seedhead</p>
