## WELCOME!

The Tri-state Greenhouse IPM Program is a collaboration among growers and specialists from Maine, New Hampshire and Vermont. This year's workshops offer sessions on the latest strategies for successful IPM of aphids with biological control and disease diagnosis and control. We will continue to gather input on grower needs and priorities and update participants on future IPM research and outreach initiatives in our area.

These workshops are for greenhouse growers of all types, extension specialists and professional pest managers. Growers of all experience levels and any state are welcome and will learn something new.
